

PB611

Bicycle Loss Prevention Handle Plug

The PB611 is a compact bicycle anti-theft device that fits inside a handlebar end cap and uses Bluetooth Low Energy (BLE) technology. It enables global location tracking and helps recover bicycles through a crowdsourced network – without requiring a SIM card. Its discreet design allows covert installation, and it is built to withstand harsh environmental conditions. The device is powered by a non-replaceable battery that lasts at least two years. With its specialized, compact design, the PB611 is an ideal solution for bicycle theft prevention, fleet management, and personal item tracking.

Bike Tacking

Covert Tracking

The PB611 is compact and conceals inside the handlebar end cap, making it hard for thieves to detect and improving anti-theft effectiveness.

Durable

Rated IP66, the device is designed to withstand harsh weather conditions.

Global Tracking Without a SIM Card

Provides global positioning without cellular networks removing frequency-band limitations.

Low Power Consumption

The built-in battery delivers a service life of at least two years.

Bike Fleet Management

Personal Item Tracking

Standard Configuration

Battery	Built-in 500mAh non-replaceable Li-po battery
Service life	At least 2 years
Range	Up to 35 m (open area, no obstacles)
Bluetooth	Bluetooth 5.0
IP rating	IP66
Operating temperature	-20 to 60 °C
Operating humidity	0~95%RH
Dimensions	Ø17mm x 46mm
Weight	13g

Standard Packing

PB611	1
Thickened gasket
