

PB704C

Wearable BLE Asset Tag

The PB704C is a BLE tracking terminal designed to keep an eye on your loved ones and to track or even recover lost personal items without the need for a SIM card. With a size akin to a wristwatch dial and a lanyard or key ring hole, it can be easily worn by pets, children or the elderly, or attached to backpacks, luggage, key chains, etc. Powered by a replaceable CR2032 battery, it provides up to 12 months of standby time.

Tracksolid

Pet Tracking and Protection

Personal Item Tracking

Keychain Tracking

Compact Size

The unit is 38mm in diameter and 9.3mm thick, similar to a wristwatch dial.

Global Connectivity

Bluetooth connectivity allows you to use it anywhere in the world at no extra cost.

Replaceable Battery

The CR2032 battery can power the unit for up to 12 months and is easily replaceable.

IP65 Water & Dust Resistance

The IP65-rated housing ensures continued optimal performance in harsh environments.

Audible Finding

The audible tone increases in volume (max. 90dB) as you approach the target.

Movement History

The movement history of the tracked object can be replayed on a designated app or URL.

Security Fence

You will be notified immediately if the tracked object leaves your preset virtual boundary.

Versatile Application

In addition to recovering lost personal items such as luggage, backpacks, key chains, and wallets, it can also be used to track and protect your furry friends, children, and the elderly.
